

Maths

with Mrs Dodd

It is our belief at Perry Hall that mathematics is not just a subject; it's a world of wonders waiting to be explored.

As an advocate for mathematics, I want to share my passion for this incredible field and emphasise why it's crucial for children to grow into mathematicians and utilise math in the world to open any child's potential. My journey with maths has been an exciting one, both as a student and as a leader. I believe that by nurturing a love for maths, we can empower our children to unlock their full potential.

Our overall aim here at Perry Hall is for all children to think mathematically, enabling them to reason and solve problems effectively - experiencing a sense of awe and wonder as they solve a problem for the first time, discover different solutions and make links between different areas of mathematics.

My passion for mathematics has been a lifelong journey: from my own enjoyment of it during my education to helping my own children to apply maths skills when cooking, shopping and playing. I am convinced that by nurturing this passion in our children here at Perry Hall, we are preparing them to thrive in a rapidly changing world.

Mathematics is not a barrier but a gateway to success among other subjects. We aim to support our children to come together to inspire the next generation of mathematicians, for they hold the key to unlocking a future filled with endless possibilities.
